## SUMMARY

Informatics Engineering student with a strong focus on DevOps and backend development. Experienced in building RESTful APIs using Laravel and managing relational databases with MySQL. Comfortable working in Linux environments (Arch Linux, Fedora, RHEL), with hands-on experience in system configuration, networking, and troubleshooting. Actively building CLI tools and backend systems focused on automation, security, and reliability.

## SKILLS

Programming: PHP (Laravel), Python, C, JavaScript (Basic)  
Backend: REST API, Authentication (Sanctum), CRUD Systems  
DevOps: Docker, CI/CD (GitHub Actions - Basic), Nginx  
System: Linux (Arch, Fedora, RHEL), SSH, Firewall, SELinux  
Database: MySQL  
Tools: Git, GitHub, CLI, Bash

## PROJECT EXPERIENCE

**ATHA – Linux Workflow Automation Tool** (Bash, Arch Linux)

- Developed a CLI tool to improve safety and transparency in package management (pacman).
- Implemented dry-run, plan mode, and local history logging.

**Bangkah Launcher – Laravel Starter Kit** (Laravel, Docker, Nginx)

- Built a production-ready Laravel project scaffold with authentication and Docker support.

**NetInfo – Network Information CLI Tool** (Python)

- Developed a CLI tool to display public IP, local IP, and system information.

**Sentinel – Security Monitoring CLI** (Python)

- Built a cybersecurity CLI tool for monitoring system and network activity.

## EDUCATION

Politeknik Negeri Lhokseumawe — Informatics Engineering (2024 – Present)

## CERTIFICATIONS

- Belajar Prinsip Pemrograman SOLID – Dicoding (2025)
- Code Generation and Optimization – IBM SkillsBuild (2025)
- Memulai Pemrograman dengan Python – Dicoding (2025)
- Memulai Pemrograman dengan C – Dicoding (2025)
- Belajar Dasar AI – Dicoding (2025)
